and the American Institute of Physics

FOREWORD

For the sake of simplicity and uniformity, all names beginning with articles or prepositions are listed as if written as single words, regardless of nationality (e.g. Van Vleck is listed as if written Vanvleck). Cross-references are included in appropriate places. Compound names are generally listed under the last component, unless hyphenated; exceptions to this rule are appropriately cross-referenced.

All names are reproduced in the abstracts and the index with the same spelling as in the original articles; in the case of articles printed in Cyrillic characters, a letter-by-letter transliteration is given. Russian authors' names may appear in Latin-alphabet publications in various forms, due to the use of different transliteration schemes; these names are reproduced as printed in the articles abstracted.

The numbers printed after the entries are the serial numbers of the abstracts, and the respective volumes are indicated by the initial number, giving the last digit of the year; thus "8 = 1234" means "Abstract 1234 of the 1958 volume".

Aa, J. M. L. C. van der. See van der Aa, J. M. L. C.
Aagard, R. L. Convection free instrument for measuring infrared radiation in the atmosphere, 9=3242
Aamodt, L. C. and Fletcher, P. C. Spin, quadrupole moment, and mass of selenium-75, 5=7288. Magnetic moment and mass of chlorine-36, 5=7291
Aamodt, R. L. See Colgate, S. A., 8=5402
Aardenne, G. M. V. Van. See Van Aardenne, G. M. V.
Aarons, J. and Barron, W. R. Sudden absorption of atmospherics due to increase in cosmic ray intensity, 7=1811
Aarons, J., Barron, W. R. and Castelli, J. P. Radio astronomy measurements at v.h.f. and microwaves, 8=1426
Aarset, B., Cloud, R. W. and Trump, J. G. Electron emission from metals under high-energy hydrogen ion bombardment, 5=344
Aarts, J., Harting, D. and Bakker, C. J. Relative oscillator strengths for lines of Fe I, 5=2566
Aarts, W. H. The measurement of surface tension for the purpose of process control, 9=6581
Abadie, P., Charbonnière, R., Gidel, A., Girard, P. and Guilbot, A. Passing of the critical frequency of a hydroxyl group from the Hertzian region to the infrared vibration frequencies of O-H, 6=3628. Passing from the radiofrequency region to the infrared and from the infrared to the radiofrequency, 7=4307
Abarenkov, I. V. Potential of a crystal point lattice, 9=2902
Abashian, A. See also Cronin, J. W., 7=9867
Abashian, A., Adair, R. K., Cool, R., Erwin, A., Leipuner, L., Morris, T. W., Rahm, D. C., Rau, R. R., Thorndike, A. M., Whittemore, W. L. and Willis, W. J. Angular distributions of positrons from $\pi^+ - \mu^+ - e^+$ decays observed in a liquid hydrogen bubble chamber, 7=6605
Abashian, A., Cool, R., and Cronin, J. W. Neutron and proton distributions in Pb, 7=2526
Abashian, A. and Hafner, E. M. Experimental test of time-reversal invariance in strong interactions, 9=1059
